

Nevada Industry Sector Council Revitalization

The Nevada Governor's Office of Workforce Innovation is revitalizing the state's industry sector councils. The council meetings will run differently than they have in the past, but the purpose remains the same – provide the mechanism for employers in Nevada's target sectors to provide feedback for system alignment. Four initial sectors have been identified for the initial launch: Manufacturing, Logistics, Technology, and Healthcare.

Three informational sessions will be held to share the purpose and vision, generate the list of interested individuals, answer questions, and articulate next steps and timeline for implementation.

**Register for and attend
one of three informational
sessions**

October 11 @ 12pm
