O&M: NDE-HHS Match Events

- Beginning August 1st, DBDriven assumed responsibilities for matching NDE and HSS economically disadvantaged student data.
  - NDE provides the NDE and HSS datasets
  - DBDriven returns a crosswalk for NDE's use

- Benefits:
  - Eliminated the need for a second DataLadder license
  - Uses NPWR for cross-agency matching

- 13 matches conducted to date

- DBDriven recommends automation of the DWSS matching process. Currently, files are manually pulled and pushed to the NDE server by DWSS, NDE and DBDriven.
