

# Male Unemployment Details

---

Presented to Barriers & Underserved Populations Subcommittee  
January 2024

Chris Sewell, Director

Troy Jordan & Josh Marhevka, Deputy Directors

David Schmidt, Chief Economist

*Prepared by the Research & Analysis Bureau*

# Data Source Overview

---

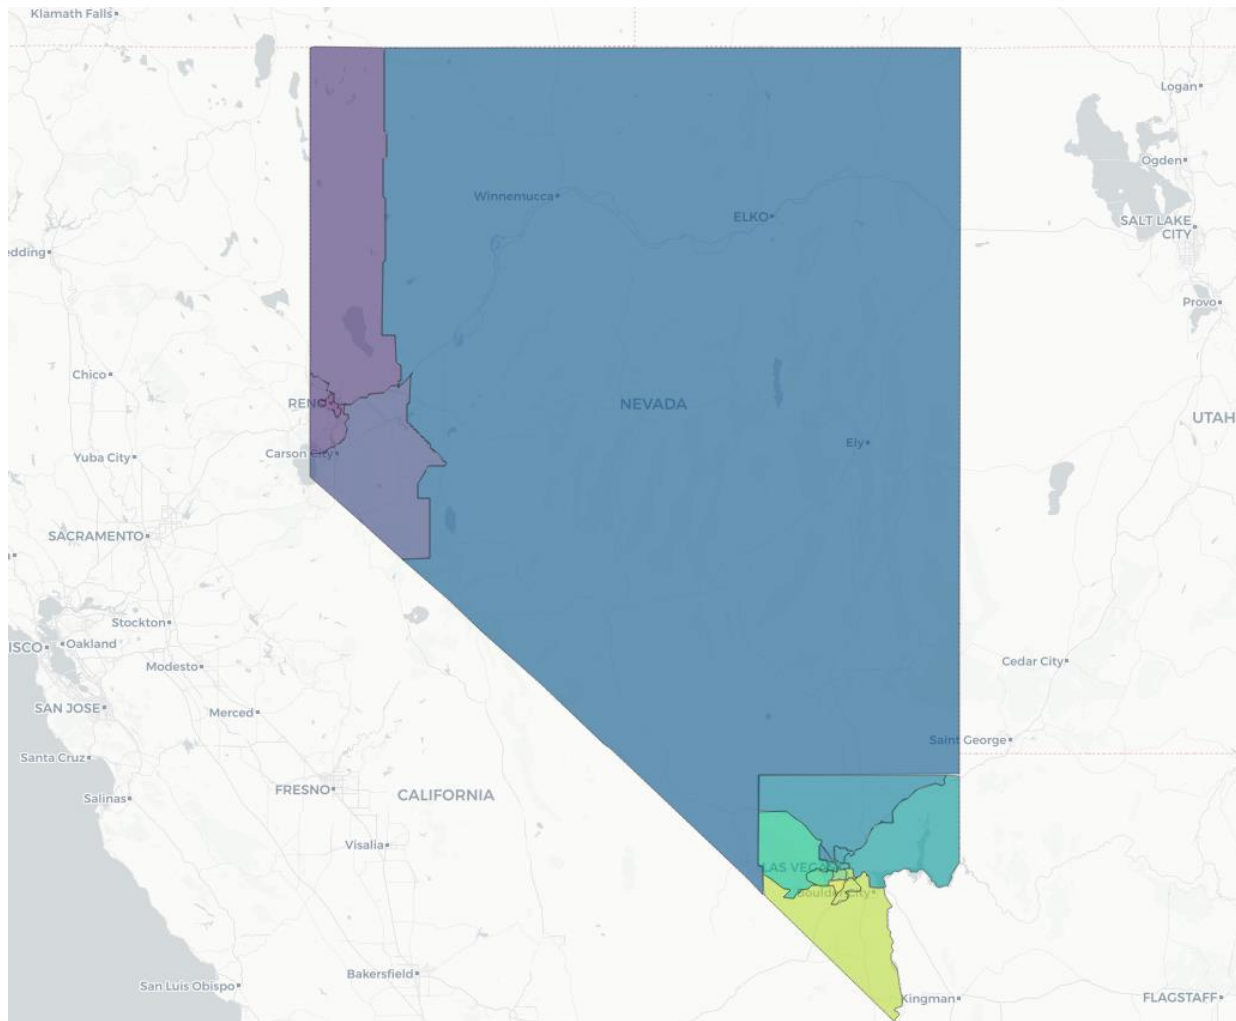

- **Current Population Survey (CPS)**
  - Conducted monthly
  - Focused on employment / unemployment
  - Small sample size
- **American Community Survey**
  - Conducted annually
  - Broader population survey including income, healthcare, housing
  - Larger sample, but at least 1 year lag
- **Administrative data**
  - Can be direct from program, or through NPWR
  - Limited to what is collected by program or ability to join data
  - Not population-wide – limited perspective based on participation

# American Community Survey

---

- **Available as 1-year or 5-year data**
  - 1 year data only available for geographic areas with a population of at least 65,000.
  - 2022 data currently available in 1-year estimates
  - 2017-2021 5-year estimates are most recent published.
- **Wide variety of geographic data available:**
  - States, counties, Census-designated places, congressional districts, state legislative districts, school districts, ZIP code tabulation areas (ZCTAs), public-use microdata areas (PUMAs)
  - PUMAs try to link similar areas but with population of roughly 100,000.

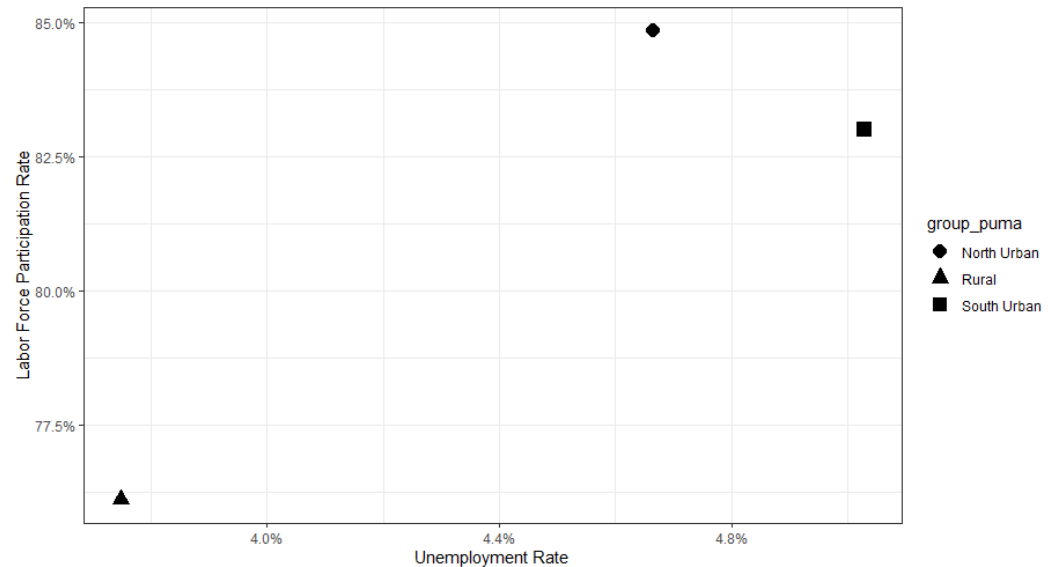

# Nevada PUMAs

# Examining Male Unemployment

- Data by grouped PUMAs in three regions
- Filtered to only male population
- Age limited to 20-64
- Data only shown where estimate is 3x the estimate's standard error.
- Even using ACS data, ability to cross-tabulate data is limited.
